2018 ACE Burger Burn

The Air Force Research Laboratory (AFRL) at Griffiss Industrial Park, Rome, NY, will host the Advanced Course in Engineering, May 30 to August 9, 2018. As it has for the last 15 years, the AFRL brings to Rome some of our most talented Junior and Senior college students (Computer Science and Engineering, Math and Physics majors) from across the country and the United Kingdom. To qualify, the attendees must have a minimum GPA of 3.5 and be motivated to train in a rigorous 10-week internship designed to prepare them for mission success in a contested cyber environment. The interns are challenged both mentally and physically in a course that espouses technical excellence, superior communication skills and on-time performance through exposure to demanding problem solving scenarios and a leadership development component which focuses on applying critical decision making skills in high stress situations. Interns receive lodging, travel allowance and a generous stipend. ACE alumni are currently employed in leadership positions throughout the US Government, the Intelligence Community, the Department of Defense and industry.

GRUC-MOAA is pleased to invite its members and community leaders to our 2018 ACE Burger Burn (grilled burgers, hot dogs and picnic fare) hosted at the Hampton Inn, 1352 Floyd Ave, Rome, NY on Wednesday, June 20th. Social hour begins at 1730 with food served at 1800. This will be a dry event since some of our students are not of drinking age. Non-alcoholic beverages will be available. This event is sponsored by GRUC-MOAA at no cost to any of the participants.

We will have extensive use of the Hampton Inn's facilities to include the main floor lounge area, a conference room and the outdoor terrace. The entire event is on the first floor with no interior stairs.

Please RSVP to Greg Bertolini at 315-272-5723 or webmaster@grucmoaa.org or to Bill Gray at 315-225-2317 or wgray@twcny.rr.com NLT Monday, June 11th.
